

Style Guide

ANDALUSIA DESIGN

© Andalusia Design – 2024

A blurred figure of a person is visible in the center of the image, appearing to move through a space with a complex, repeating geometric pattern. The pattern consists of interlocking, angular shapes that create a textured, almost crystalline appearance. The overall color palette is muted, with various shades of brown, tan, and beige. The text is overlaid on this background.

HIGH DESIGN MEETS DIGITAL FABRICATION

Andalusia Design is a specialty walls, ceilings and space dividers manufacturer based in Austin, TX, USA

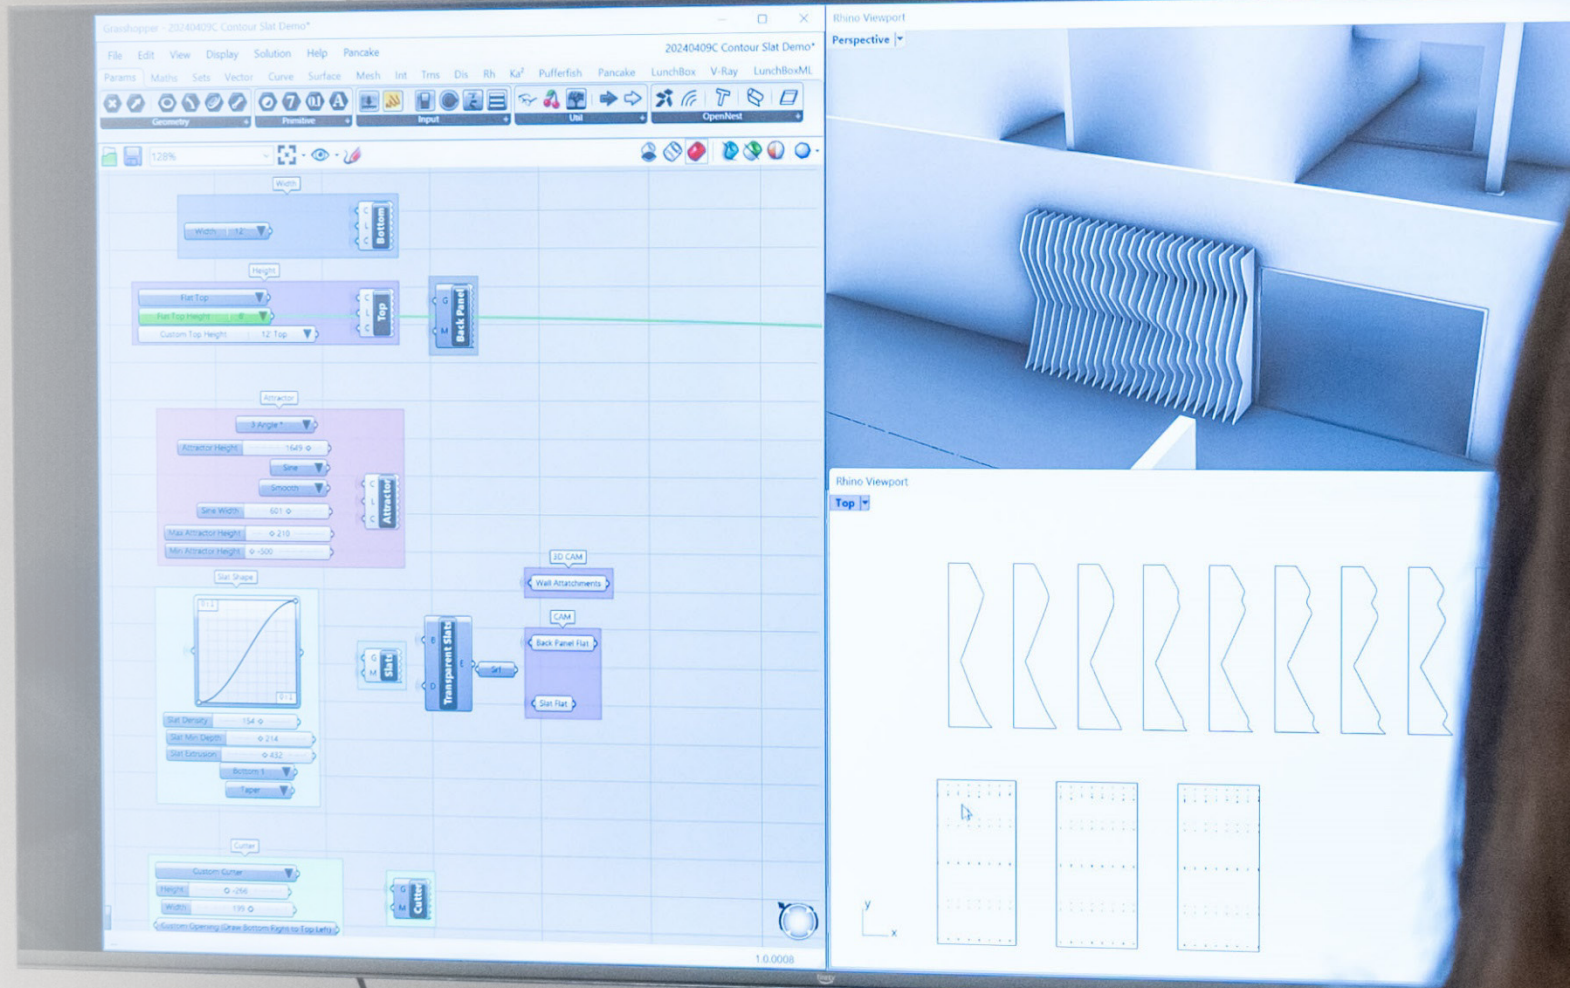

We combine parametric design with digital fabrication to deliver high-design systems with unparalleled flexibility, speed and efficiency

Andalusia products are
parametrically-driven

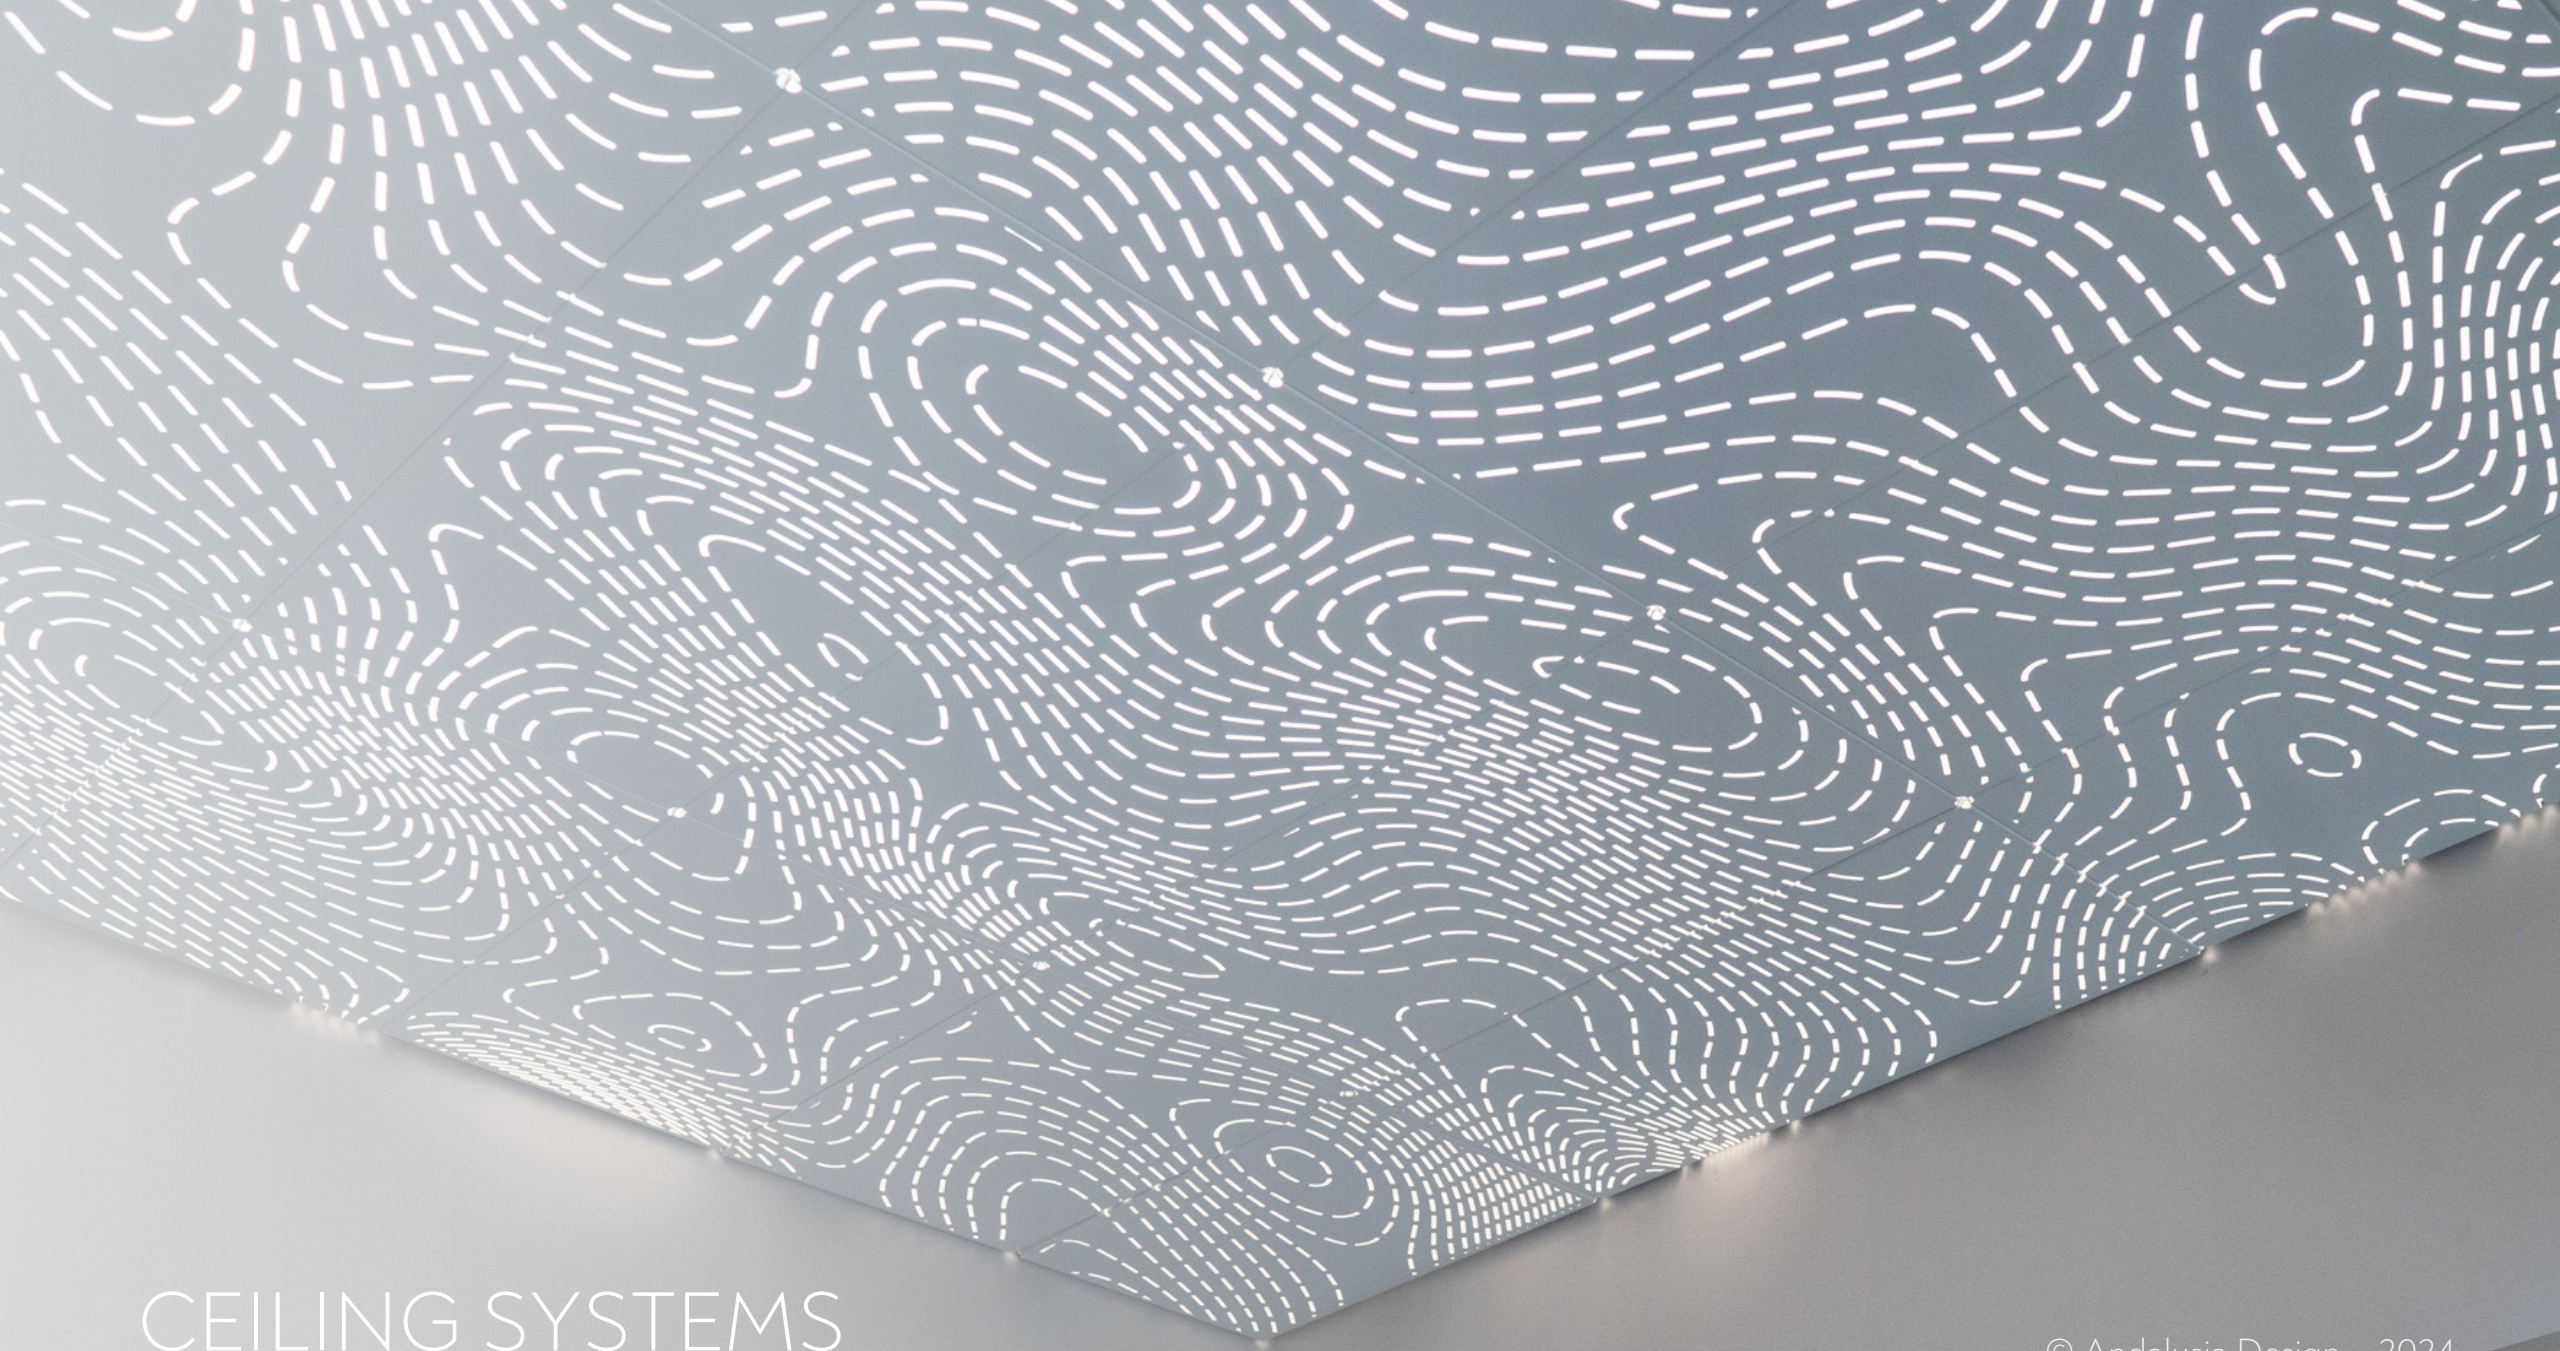

Modify shape, pattern,
dimensions, materials &
finishes in real-time

Cleanly integrate all
component elements,
such as HVAC & Lighting

SPACE DIVIDERS

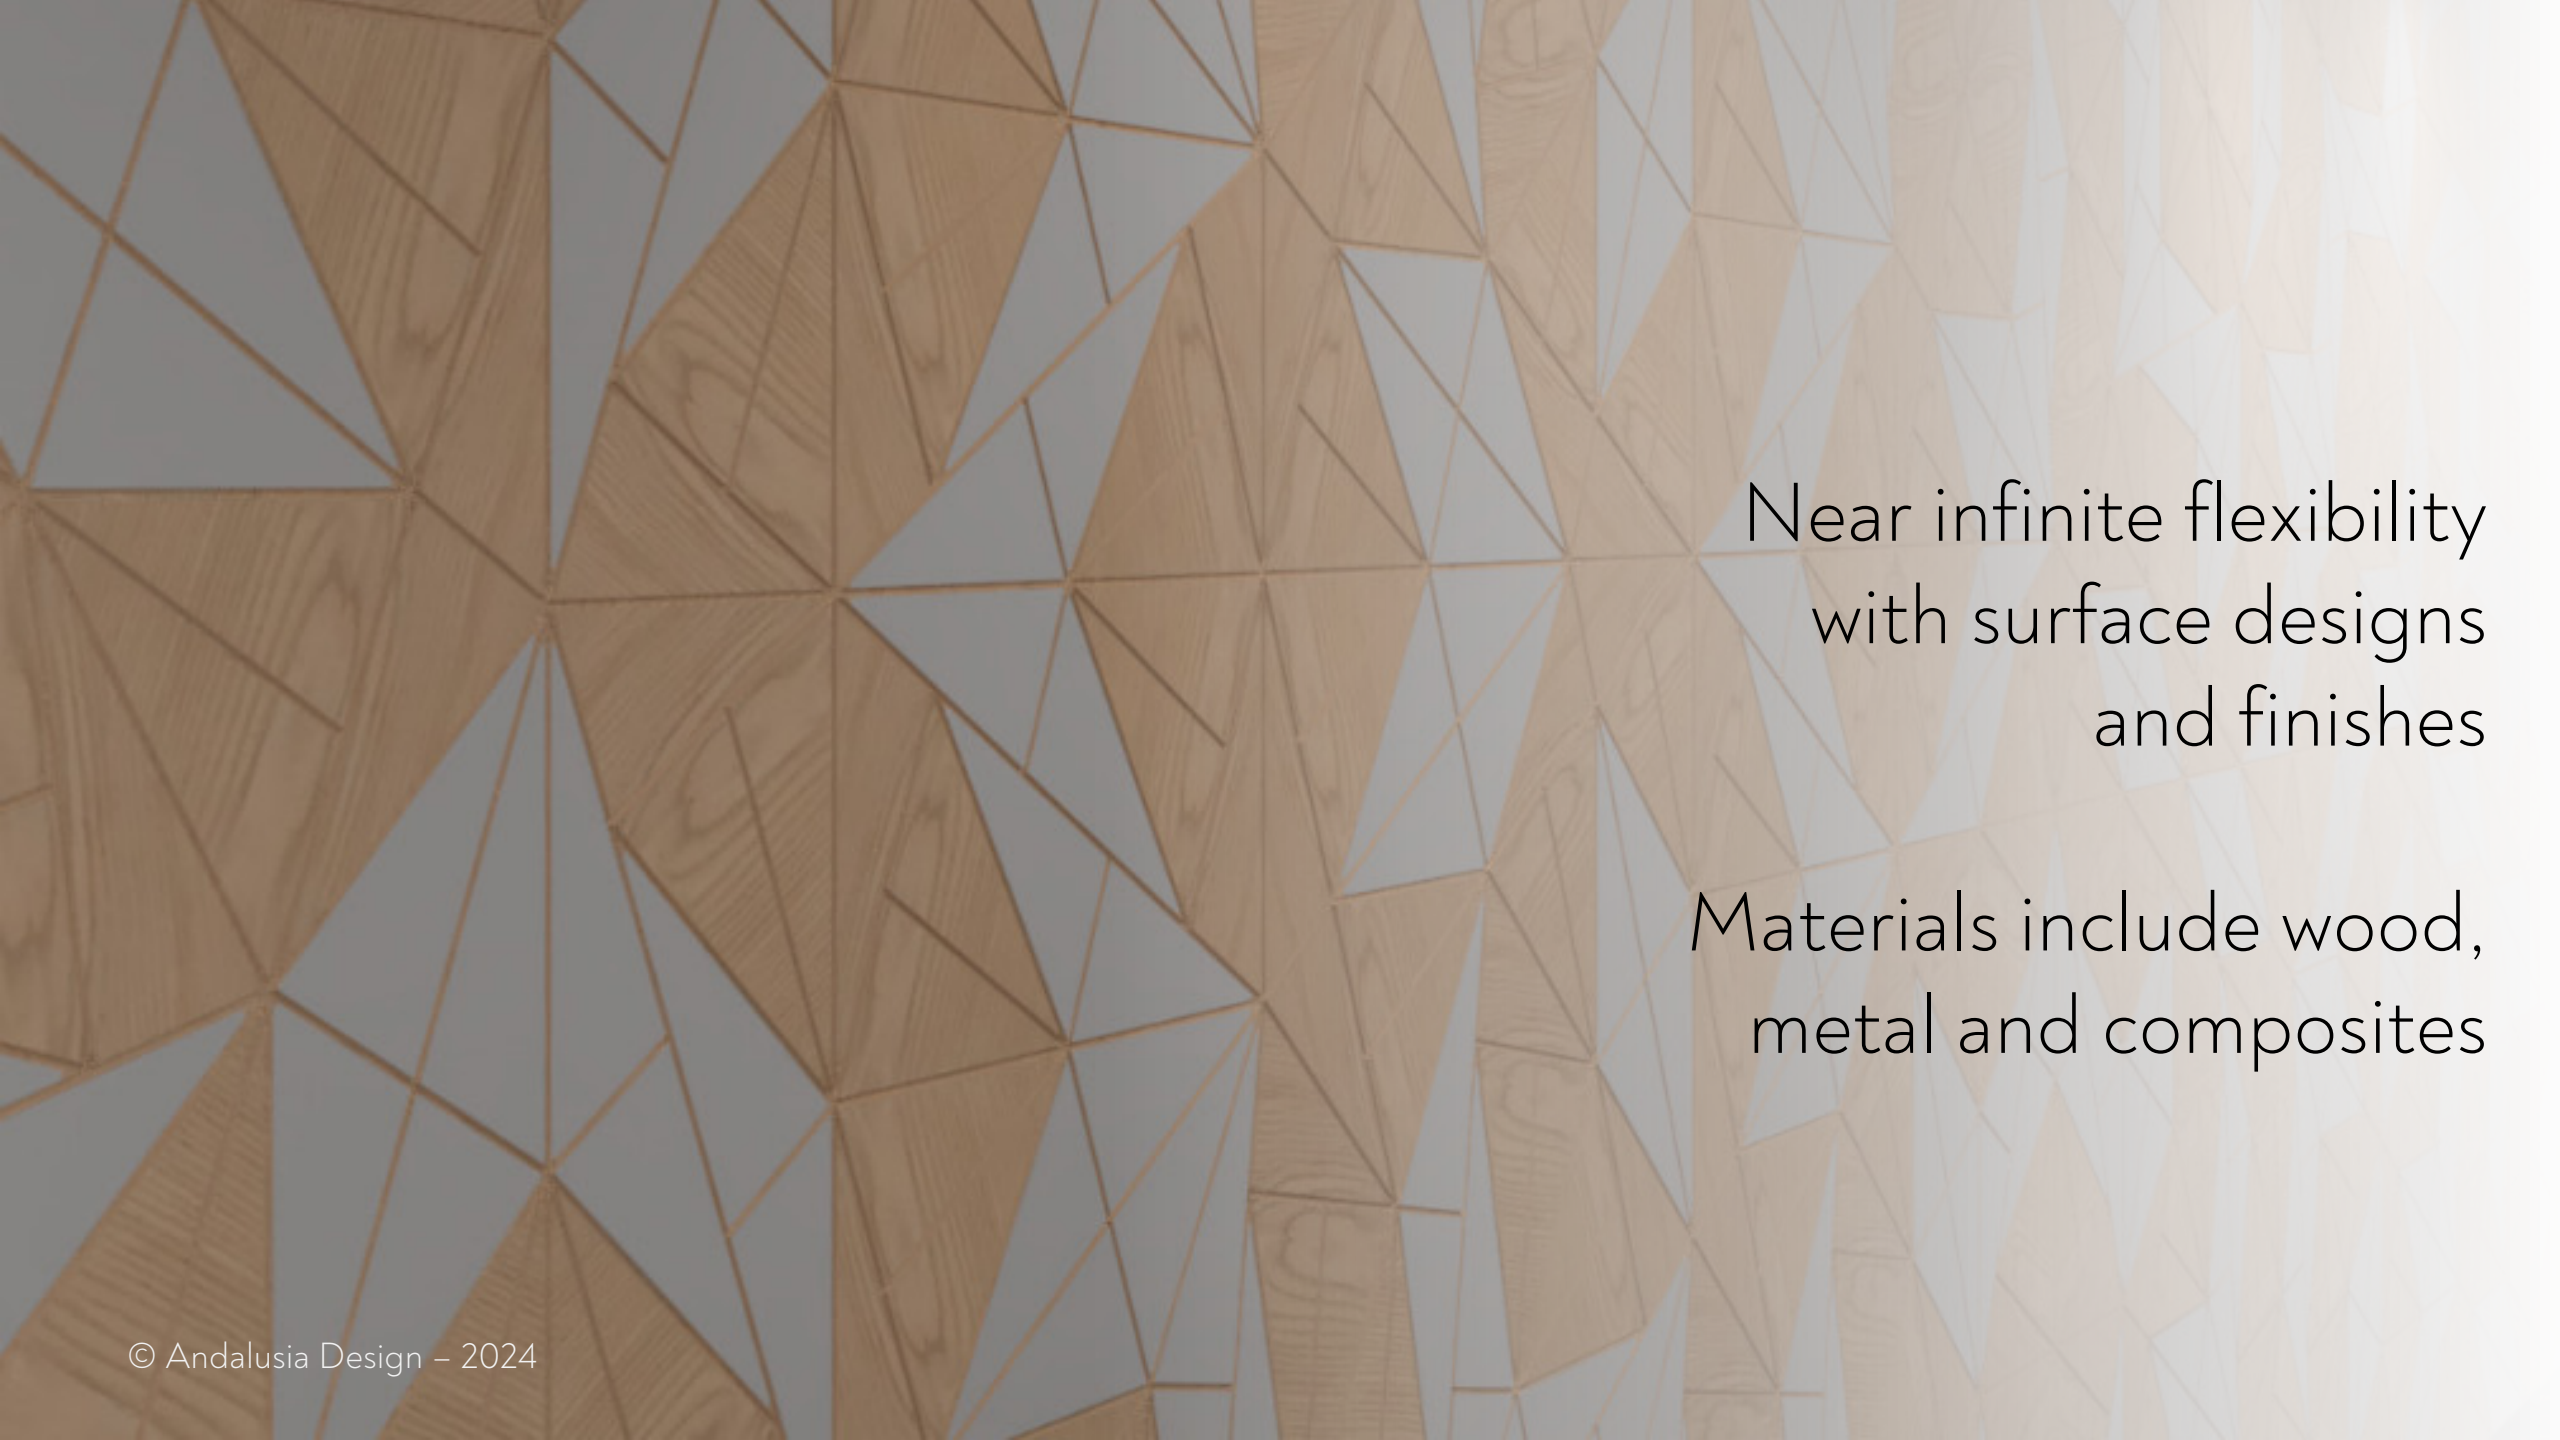

CEILING SYSTEMS

FEATURE WALLS

The background of the slide is a complex, abstract geometric pattern. It consists of numerous triangles of various sizes and orientations, creating a tessellated effect. The triangles are filled with a light brown or tan color that has a subtle wood grain texture. The lines separating the triangles are thin and dark, creating a network of sharp angles across the entire surface. The overall effect is one of organic complexity and modern design.

Near infinite flexibility
with surface designs
and finishes

Materials include wood,
metal and composites

From conceptual
design to installation...
we make the custom
process feel standard

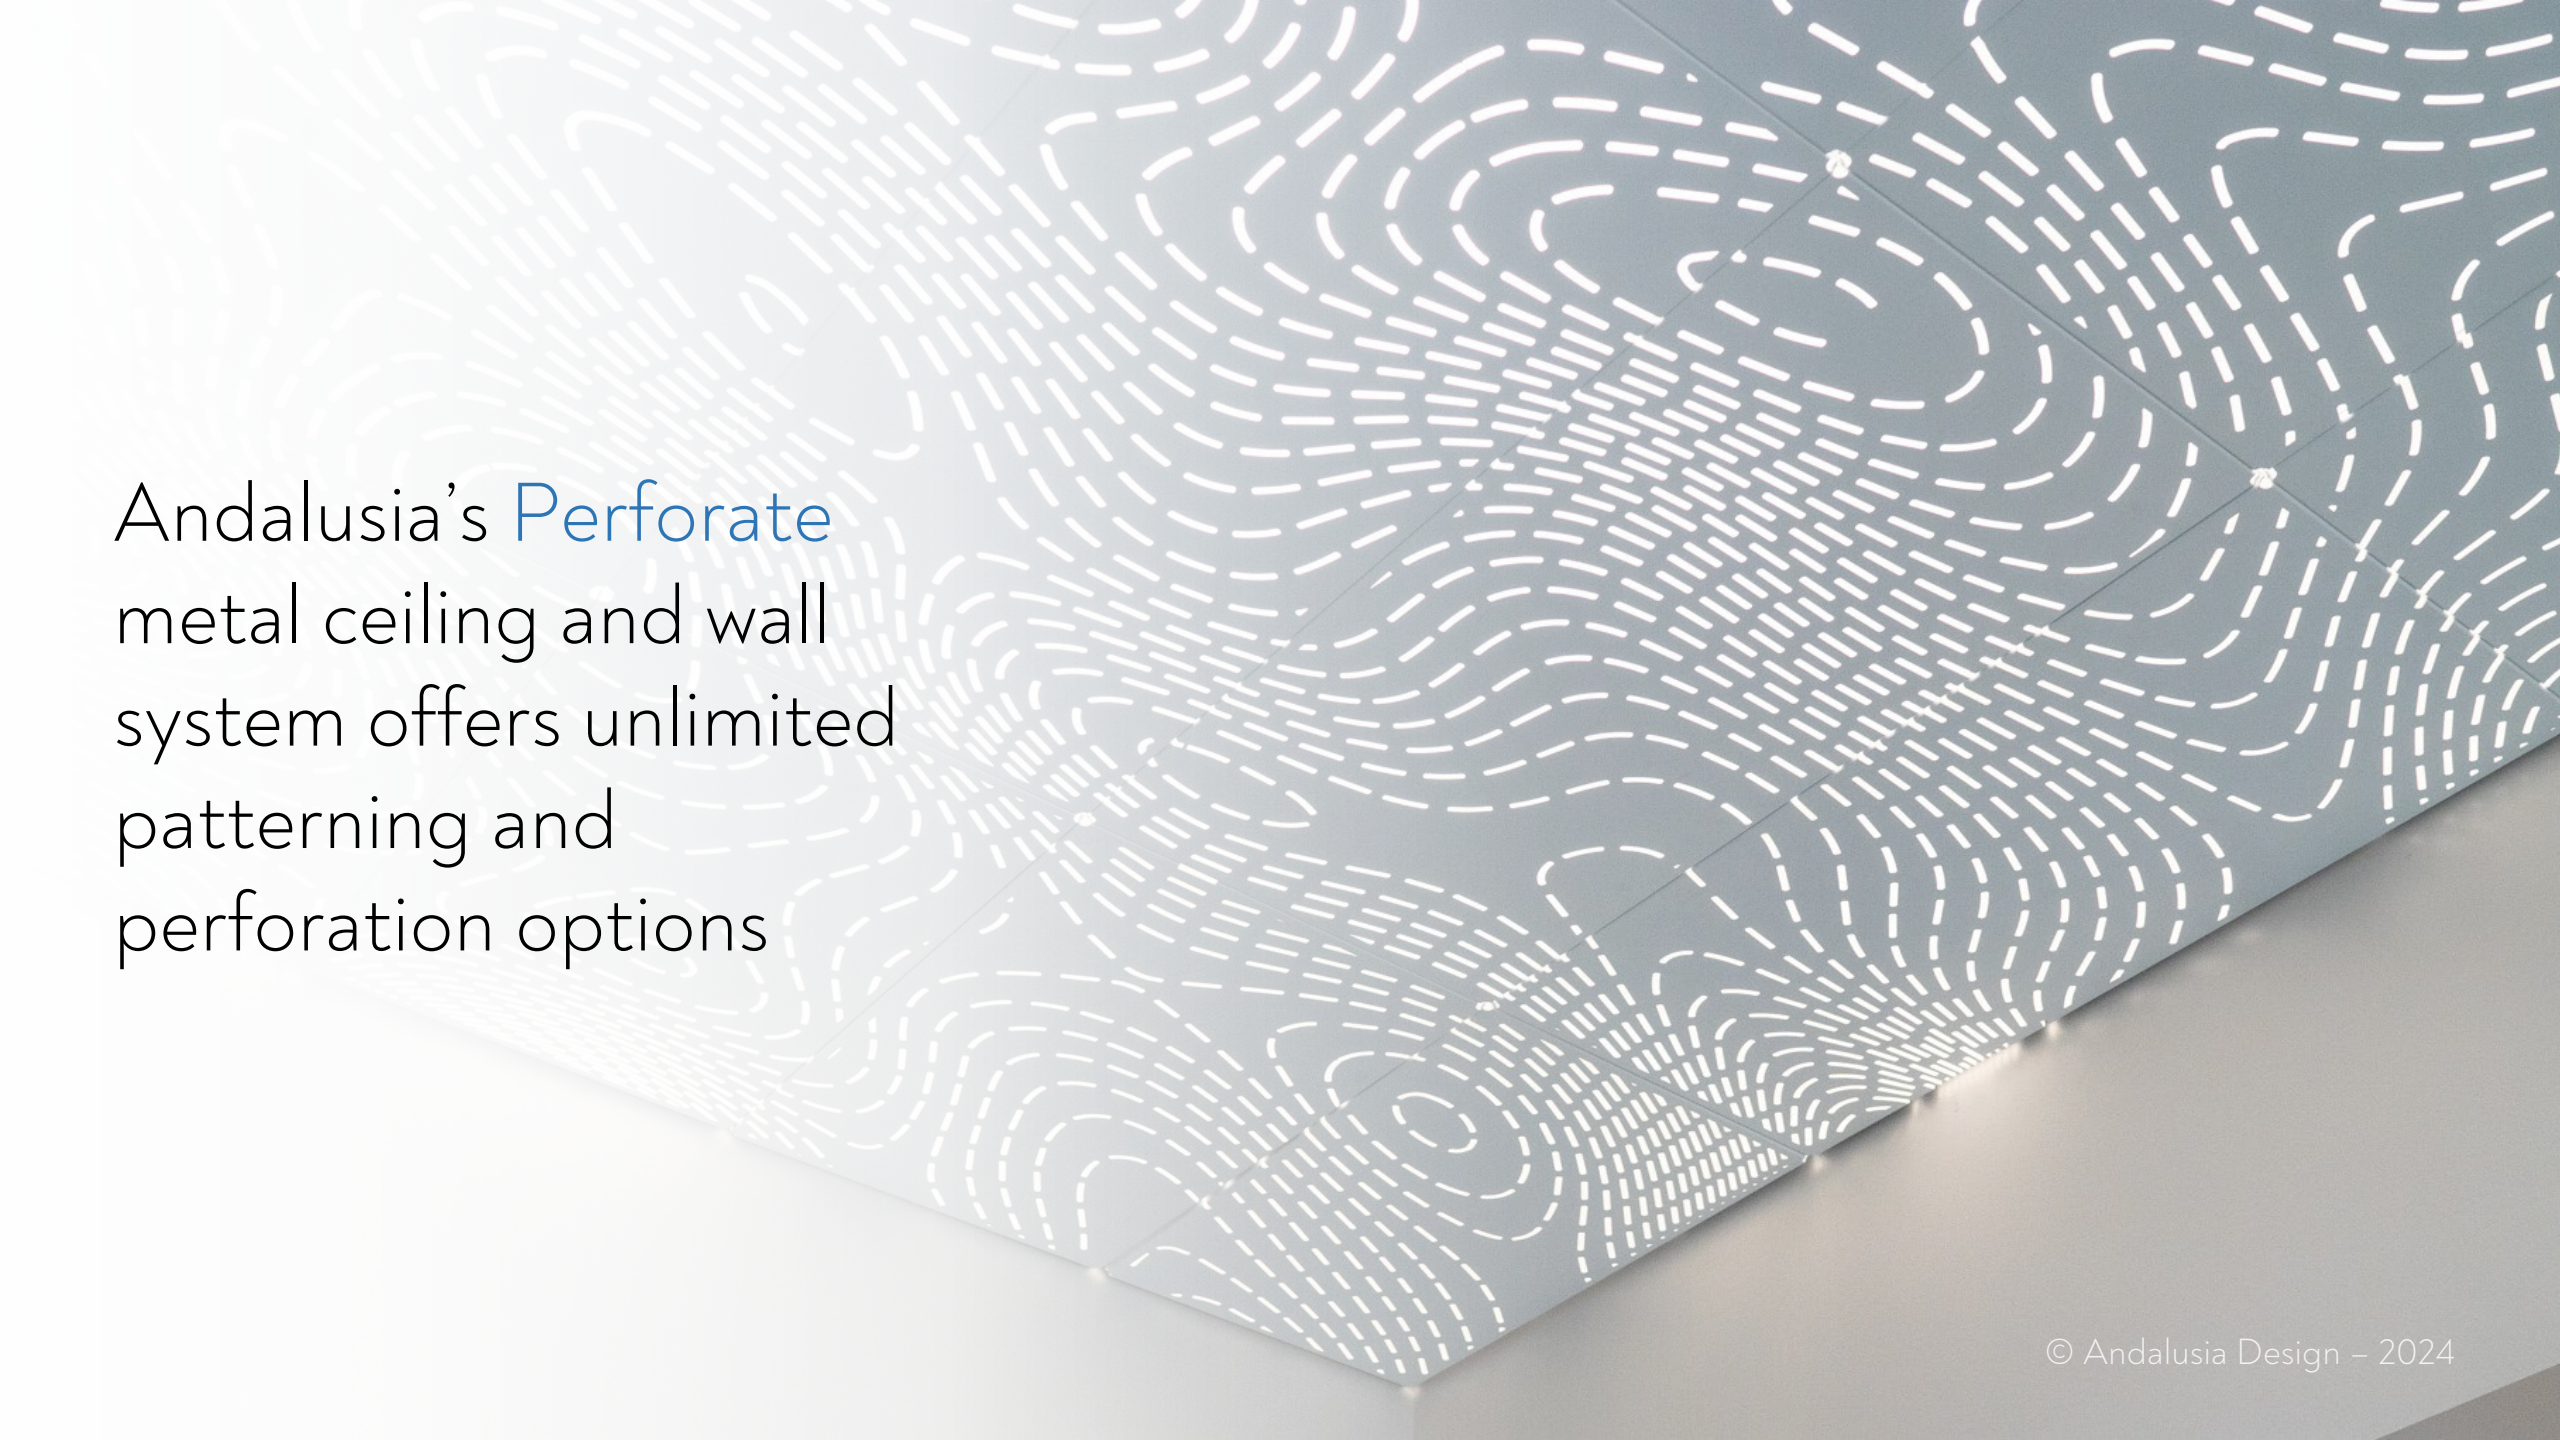

A man in a blue jacket and dark pants is walking from left to right through a modern office hallway. The wall behind him is composed of numerous vertical panels in various shades of gray, black, and white, some of which are illuminated from within. The floor is covered in a dark, patterned carpet. The overall atmosphere is clean, minimalist, and professional.

Create seamless,
integrated space
solutions

PERFORATE™

Parametric Metal Wall
and Ceiling System

Andalusia's **Perforate**
metal ceiling and wall
system offers unlimited
patterning and
perforation options

FLOW

Bring tranquil beauty into your design by capturing movement. Layering and dimensionality trick the eye, adding depth and complexity to the overall visual experience.

STREET GRID

Replicate detailed street maps with designs that reflect the character of specific locations.

Whether celebrating a hometown or highlighting a place, the pattern provides a captivating feature.

FIELD WAVES

Capture the serene beauty of undulating fields with a flowing wave design that mimics the curves and rhythms of a landscape, while also seamlessly interacting with integrated ceiling and wall elements.

IMAGE

Combine durability with artistic expression. Patterns can be customized to reflect personal preferences, branding, or artistic concepts, making it an ideal choice for creating memorable and stunning environments.

RESPONSIVE TRIANGLES

Scales and rotations of triangular tiles are parametrically driven, creating a dynamic surface. Allows for geometric precision and organic movement.

ORGANIC ELEMENTS

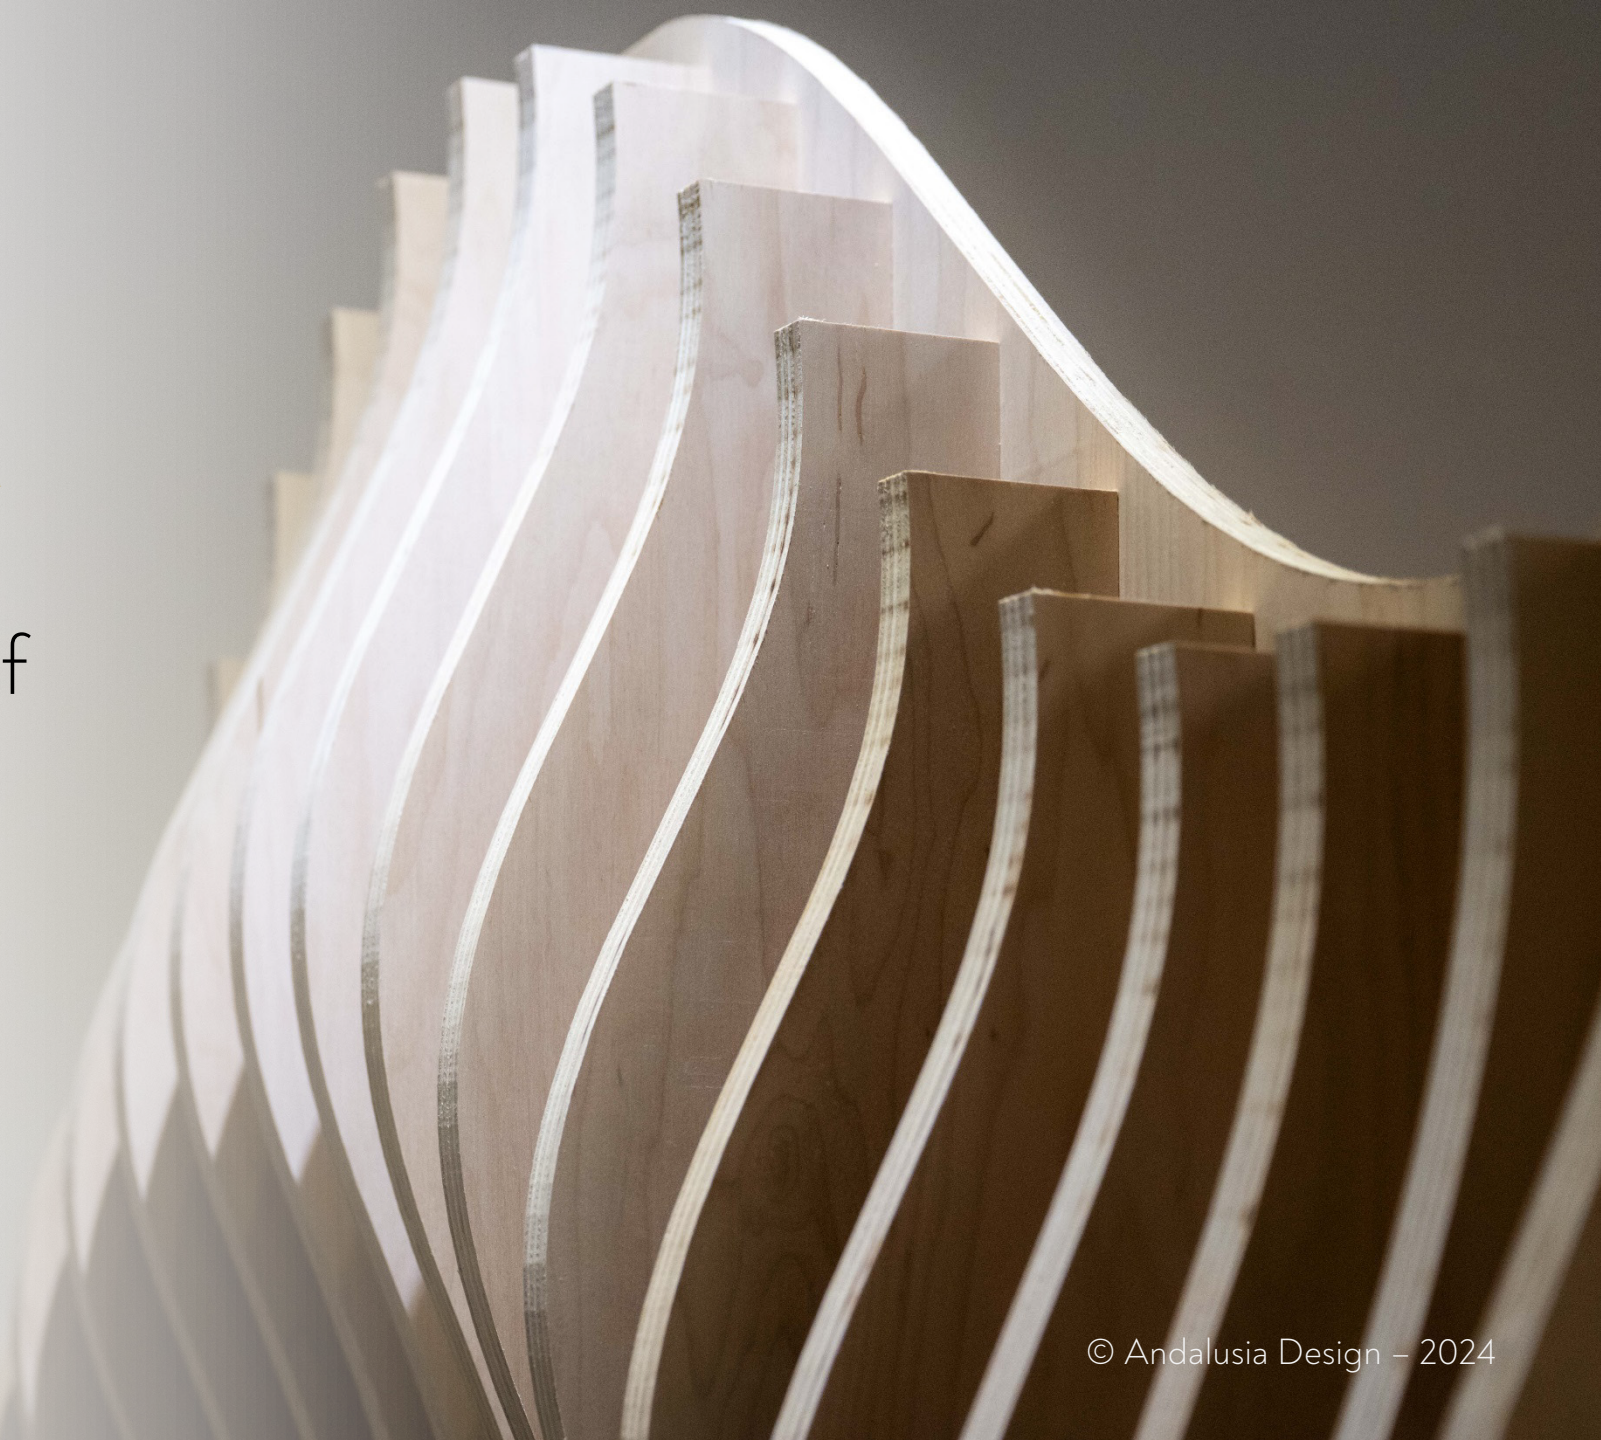

Introduce a natural and fluid aesthetic to your space. Each panel is crafted with irregular or varying hole shapes, creating a dynamic and engaging pattern that mimics natural forms.

CONTOUR SLATS™

Parametric Wood Wall,
Ceiling and Space
Divider System

Andalusia's **Contour Slat** system is designed to meet the unique needs of your project... and the **unique brand** of your client

The image shows a wall-mounted decorative piece. It consists of a central rectangular panel covered in green moss. This panel is surrounded by numerous thin, light-colored wooden slats that are angled at various degrees, creating a complex, faceted geometric pattern. The slats are arranged in a way that they appear to radiate from the central moss panel. The overall effect is a three-dimensional, sculptural wall art.

FACET

A striking geometric design that adds dimension. Each slat is precisely angled to create a pattern of facets, producing a play of light and shadow that changes with the viewing angle.

LOGO

Seamless incorporation of branding and company identity. Each slat is crafted to integrate the logo, ensuring it stands out while maintaining the overall aesthetic harmony of the wall.

ANDALUSIA

WAVE

Undulating pattern that adds dynamic movement and dimension. Like ripples created by a stone in water, the seamless curves and wood finish provide a serene and visually-captivating feature.

DIVIDER

A solution for defining spaces in open floor plans. It can be straight or curved to ensure space definition and wayfinding. Vertical panels and shelving provide a balance of privacy and openness.

NATURAL

Organic, flowing shapes that mimic forms found in nature. Each slat is intricately crafted to create gentle, irregular curves and patterns, evoking the essence of natural landscapes to bring tranquility and harmony.

TEXT

A unique way to display text seamlessly within the wall's pattern, creating a visually striking feature. This experiential graphics design tool is perfect for adding quotes, mottos or any text that enhances your space.

ETCH™

Parametric Wood Wall
and Space Divider
System

Andalusia's parametric
Etch system takes custom
wall designs to the next
level... you'll never look at
tiling the same way again

PINWHEEL

A design built using a repeated fractal computation that creates a distinctive system. Novel tile patterns can be created by applying color or materials to the elements before running the computation.

TRUCHET

Infuse geometric elegance and mathematical beauty into your design. Customize to highlight variations and complexities. Like all Etch systems, it intelligently panelizes to hide panel-to-panel transitions.

RESPONSIVE TRIANGLES

Scales and rotations of triangular tiles are parametrically driven by attractor curves, creating a dynamic surface. Allows for geometric precision and organic movement.

MAZE

A detailed design that transforms a wall into a visual journey. Meticulously crafted to create a complex pattern, Maze adds a playful and engaging element to your built environment.

LINES

A sleek aesthetic that adds height and elegance. It features precisely cut slits – vertical, horizontal or on angle – creating dynamic patterns that play with light and shadow. Easily integrate lighting and other materials.
